

We are writing to register our strong opposition to proposed bill #5429. We urge you to reject it.

If passed, we believe this bill will create terrible density in sections of Westport that will destroy the Town's quality of life. Also, the overly dense housing developments the bill would allow will undermine property values.

We understand the need for more affordable housing, but we believe this can be achieved in partnership with town government and in a way that is workable for everyone.
